Quickly Adsorb And Charge

Customized for iPhone 13/12 models, once the Phone is close to the wireless magnetization module, it will auto precise positioning and adsorption. Press power button once and start wireless charging.

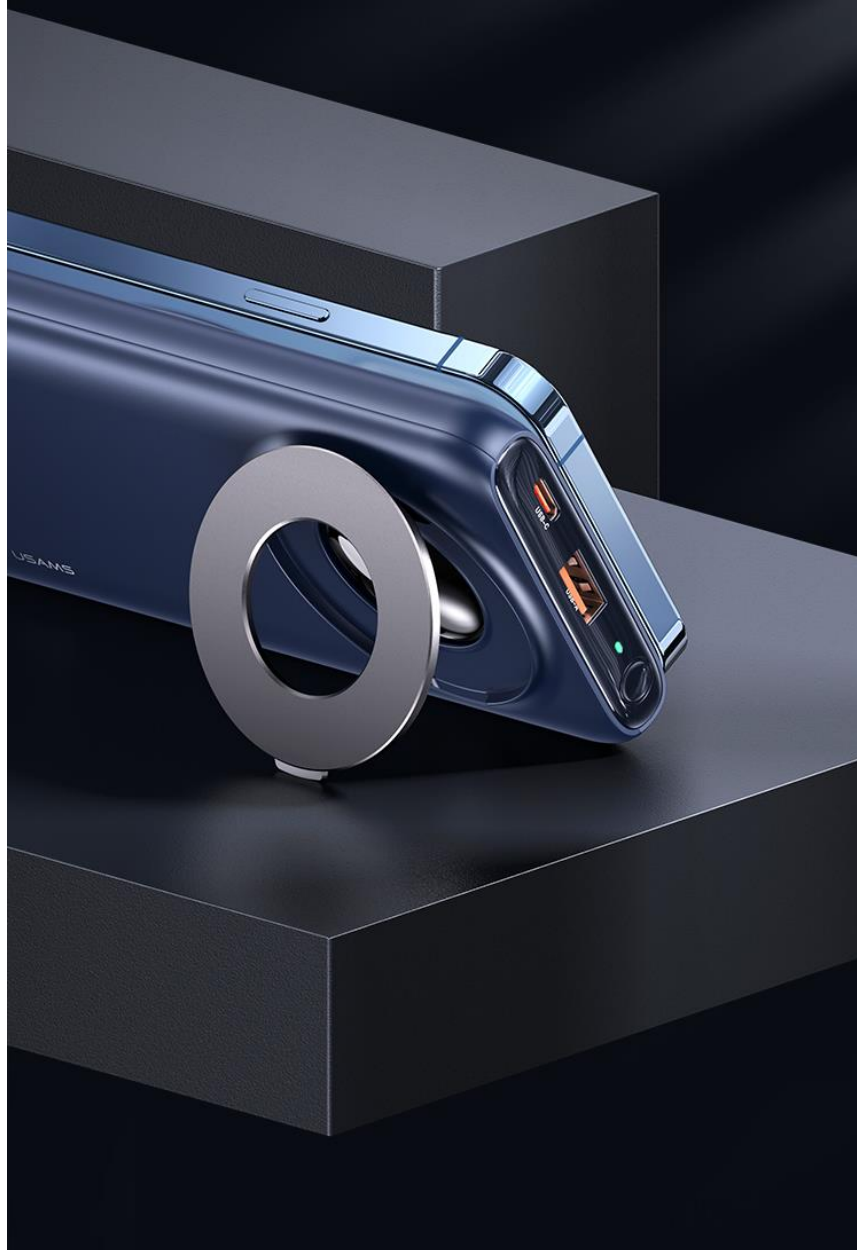

- ① It is recommended to use with MagSafe case or USAMS magnetic case or using without case. Do not use with third-party magnetic adsorption accessories.
- ② Do not use non-magnetic protective cases, which may weaken the product's magnetism.
- ③ It supports magnetic wireless charging for iPhone 13/12 series only; it supports non-magnetic wireless charging for other models with wireless charging function.

Unfold The Stand Charging While Watching Videos

With folding holder, flexible and multi-purpose.

Can Hold for AirTag

With storage hole for AirTag, take it out at will,
very convenient in use.

Wired + Wireless Charging Charge 3 Devices in Sync

Support wired + wireless outputs, meet
various charging needs.

* If start charging for smart devices via USB cable when power bank is already in wireless charging output status, the wireless output will auto resume after a short interruption, which is not a malfunction, but a normal response of the product when it auto recognizes wired output protocols.

PD

/ Cable Output

For iPhone 8-13 50% Charged After 30mins

⚡ 50%

30Min

Type-C interface supports PD20W/18W wired output, charging speed increased by 3 times.

*Note: It requires to use with Type-C to Lightning PD fast charging cable;
The data is from USAMS and might have small deviation in actual use.

/ Cable
Output

22.5W

For Huawei P40
64% Charged After 30mins

30Min

⚡ 64%

The USB port supports for Huawei 22.5W fast charging/FCP/Xiaomi QC/Apple2.4A and other protocols, quick charging various models.

*Note: It requires to use with Huawei fast charging cable; The data is from USAMS and might have small deviation in actual use.

3.5hrs

PD Two-way Fast Charge Get Fully Charged in 3.5hrs

PD two-way fast charging, using with 18W PD fast charger to fully charge for the power bank itself (Input) in 3.5hrs.

*Note: The data is from USAMS and might have small deviation in actual use.

10000mAh

Big Capacity LED Screen Display Battery

LED screen digital displays available power.

Xiaomi 11 (4600mAh)

Charge About **1.3** times

Huawei P40 (3800mAh)

Charge About **1.6** times

iPhone 12 (2775mAh)

Charge About **2** times

*Note: The data is from USAMS and might have small deviation in actual use.

Li-polymer Battery Quality Assurance

Ultra-big capacity lithium battery cell energy storage, using intelligent IC and multiple protection circuits, high-efficient charging.

Overcharge protection

Over-discharge protection

Overvoltage protection

Overcurrent protection

Overpower protection

Overheating protection

Anti-reverse protection

Short circuit protection

Battery protection

Electromagnetic field protection

PRODUCT INFORMATION

Name: PB62 QC3.0+PD20W Magnetic Wireless Fast
Charging Power Bank

Brand: USAMS

Model: US-CD171

Material: ABS+PC

Color: Black/White/Purple/Blue

Capacity: 10000mAh

Rated Capacity: 6000mAh

Rated Energy: 37Wh

Power: 22.5W (Max)

Weight: About 244g

Size: 72.3*23.5*15.5mm

Type-C Input: 5V \equiv 2.4A 9V \equiv 2A 12V \equiv 1.5A

Type-C Output: 5V \equiv 2.4A 9V \equiv 2.22A 12V \equiv 1.67A

USB Output: 4.5V \equiv 5A 5V \equiv 4.5A 5V \equiv 3A

9V \equiv 2A 12V \equiv 1.5A

Wireless Charging
Output: 15W (Max)

Three Outputs in
Sync: 5V \equiv 3A

Charging Time (Input):
About 3.5 hours

Battery: Li-polymer
battery

Accessory: Type-C
charging cable*1

Compatibility: For
digital devices
