

929 II Hand-held Internal Heating with LED temperature display

Soldering Iron Automatically Send Tin Gun Soldering Welding Repair

Tool

Features.

1. Adopt PID program control temperature control technology, the temperature compensation speed is fast, and the error is small.
- 2, the use of internal heating type heating core, high efficiency.
- 3, the motor sends tin, one-handed operation of the product for welding, feel comfortable, convenient and efficient.
4. It is simple to replace the solder wire.
- 5, with a power switch, can be turned off when not in use, safe and energy efficient.
- 6, the internal use of SMT double-panel process manufacturing, neat process, solder joints.
- 7, machine design has the following user-friendly features:
 - a, with Fahrenheit / Celsius conversion function: temperature display mode designed to meet the needs of different regional markets, can be selected according to customary interests.
 - B, 10 minutes sleep function. The "SLP" is displayed as a sleep state prompt. Wake up sleep method: a, shake the soldering iron handle several times. b. Press any key once. c. Turn off the power switch and turn it on again.
 - c. Digital temperature correction function: It is suitable for the temperature deviation of the

soldering iron and the display due to environmental influences or replacement of heating elements such as heater cores and soldering iron tips. It can be corrected by this function.

Specification

Power supply voltage	220V 240V,50Hz,110~127V,60Hz
MAX power	135W
Rated power	20W
Temperature range	90°C~480°C
Temperature display type	LED display
Temperature stability	±2°C (Static)
Tip to ground impedance	<2ohm (three pin plug power cord)
size	L186xW230xH52MM±5MM
weight	
working environment	0~40°C/32~104°F
Storage environment	-20~80°C/-4~176°F
Storage humidity	35%~45%

We accompany with 1.0mm 50g lead free solder wire together

Inside like this packing

The soldering iron heater is imported heater ,and the soldering iron tips used for same as our machine soldering iron tips 900M-T series tips ,please note, thanks.

The heating elements is Plug and unplug type ,it's very convenience for replace the heating elements.
