GLASSES TYPE WATCH REPAIR MAGNIFIER WITH LED LIGHT

ILLUMINATION: LED LIGHT USES, 2CR1620 BATTERIES(BATTERIES INCLUDED)
Multiple: 20x

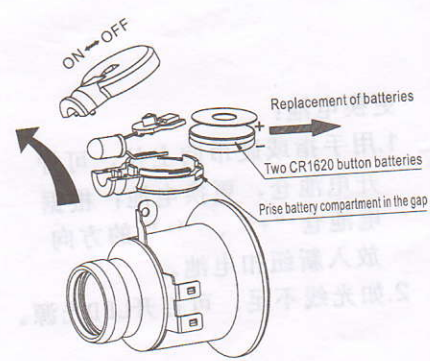

It is quite inconvenient to use common clock repair magnifier by clamping it with eyelid, which might affect the repair quality of precise instruments and clocks. This magnifier adopts eye glasses design function. When magnifying function is not used, eyeflap can be overturned freely without taking off glasses frame which brings convenience to users and makes it easier and more precise to repair precise instruments and clocks.

Turn on the light source if insufficient light

Eyeflap can be overturned freely.

- Replacement of batteries:**
1. wist off battery compartment to replace batteries by upward pulling with hand or coin; put new button-shaped batteries into it according to the "+"、"- " mark of batteries.
 2. turn on led illuminating source under poor light.
