

8-Bit Programmable 2- to 5-Phase Synchronous Buck Controller

ADP3189

FEATURES

- Selectable 2-, 3-, 4-, or 5-phase operation at up to 1 MHz per phase
- ±7.7 mV worst-case differential sensing error over temperature
- Logic-level PWM outputs for interface to external high-power drivers
- Active current balancing between all output phases
- Built-in power good/crowbar blanking supports on-the-fly VID code changes
- Digitally programmable 0.5 V to 1.6 V output— supports both VR10.x and VR11 specifications
- Programmable short-circuit protection with programmable latch-off delay

APPLICATIONS

Desktop PC power supplies for Next generation Intel® processors VRM modules

GENERAL DESCRIPTION

The ADP3189¹ is a highly efficient multi-phase synchronous buck switching regulator controller optimized for converting a 12 V main supply into the core supply voltage required by high performance Intel processors. It uses an internal 8-bit DAC to read a voltage identification (VID) code directly from the processor, which is used to set the output voltage between 0.5 V and 1.6 V.

For more information about the ADP3189, contact Analog Devices via email at mary.burke@analog.com and lee.space@analog.com. This device uses a multi-mode PWM architecture to drive the logic-level outputs at a programmable switching frequency that can be optimized for VR size and efficiency. The phase relationship of the output signals can be programmed to provide 2-, 3-, 4-, or 5-phase operation, allowing for the construction of up to five complementary buck switching stages.

The ADP3189 also includes programmable no-load offset and slope functions to adjust the output voltage as a function of the load current, so it is optimally positioned for a system transient. The ADP3189 also provides accurate and reliable short-circuit protection, adjustable current limiting, and a delayed power good output that accommodates on-the-fly output voltage changes requested by the CPU.

ADP3189 is specified over the extended commercial temperature range of 0°C to +85°C and is available in a 40-lead LFCSP package.

¹ Protected by U.S. Patent Number 6,683,441; others pending.
